| • Next-JS | |

LANGUAGES

- English (Fluent)
- Igbo (Basic)

PROFESSIONAL SUMMARY

Software Developer with strong backend experience building, upgrading, and maintaining production systems using Laravel, PHP, and MySQL. Proven ability to work with existing codebases, modernize legacy applications, and ship reliable features in real-world service platforms. Comfortable owning backend systems while collaborating across full-stack requirements.

WORK EXPERIENCE

Aide-App

2023- 2024

Service Marketplace

- Problem: Needed a reliable backend to support core application features and data flow.
- Built and maintained backend APIs, database logic, and server-side workflows.
- Result: Stable backend services supporting production features and user operations.
- Tech: Laravel, PHP, MySQL, JavaScript, Git.

QuickPay

2025 - PRESENT

VTU Platform (Nigeria)

- Problem: Laravel 8 system with poor structure and growing technical debt.
- Upgraded the codebase to a newer Laravel version, refactored structure, and fixed compatibility issues.
- Result: Cleaner, more maintainable backend with improved stability for live payment services.
- Tech: Laravel, PHP, MySQL, Git.

Fashion UI Project

2023- 2024

Fashion Platform

- Problem: Needed a clean, responsive interface to demonstrate frontend capability.
- Built a modern, responsive UI with reusable components and optimized layouts.
- Result: Visually clean, fast frontend showcasing strong UI and responsiveness.
- Tech: HTML5, CSS, Tailwind CSS, JavaScript.
